TECHNICAL SKILLS

Languages & Frameworks: React, Next.js, Angular, TypeScript, JavaScript, Node.js, Express

Architecture & Tools: Redux, RBAC, White-label/Multi-tenant, SPA SEO, Performance Optimization, REST APIs, WebGL

Cloud & Deployment: AWS S3, Azure Blob, Vercel, Cloudflare

Others: MongoDB, MySQL, Git, Jira, Bootstrap, SCSS

EXPERIENCE

Frontend Developer

Mar 2025 – Jan 2026

TechBinary (Blueberry Group) - TravelTech

Jaipur, India (On-site)

- Revamped flagship travel platform supporting 40+ global branches with performance, SEO and scalable frontend architecture improvements
- Achieved **4s** → **0.7s** first-load time and improved Lighthouse scores through asset optimization, caching, lazy loading and SPA SEO techniques
- Built dynamic branch-driven experiences (blogs, FAQs, galleries, UGC, multilingual) and CRM-integrated lead generation systems
- Contributed to Next.js Bottom Funnel platform with SSR, API-driven component registry and admin-controlled dynamic rendering
- Owned frontend development for Roadster Bikes lead-generation platform using JSON-driven architecture

Consultant - Frontend Engineering

Sep 2022 – Feb 2025

Virtual Diamond Boutique (VDB) - JewelryTech

Gurugram, India (Hybrid)

- Built interactive 3D jewelry configurator supporting **1200+ dynamic combinations** using React, TypeScript and WebGL
- Led white-label multi-tenant systems for 30+ clients with custom themes, localization and tenant-specific branding
- Contributed to Angular to React migration enhancing scalability and maintainability
- Implemented RBAC workflows for Admin, Organization and User-level permissions with secure authentication
- Developed advanced product discovery systems (SKU, barcode, camera search) with pagination, infinite scroll and filters
- Resolved 250+ Jira tickets and delivered production platforms including gndiamond.com, sabanonyx.com

Database Intern

May 2021 – Jul 2021

National Informatics Centre (NIC), Govt. of Rajasthan

Jaipur, India

- Gained hands-on experience with database design, workflows and real-world system requirements

FEATURED PROFESSIONAL PROJECTS

Blueberry Travel (BBT) | Flagship Multi-Branch Travel Platform

Live

- Revamped core frontend for 40+ branch ecosystem including visas, flights, hotels, check-ins and dynamic content management

Virtual Diamond Boutique (VDB) | Jewelry E-commerce Platform

Live

- Developed 3D configurator, white-label storefronts, RBAC and product discovery features serving multiple clients

Bottom Funnel | Next.js Lead Generation SaaS

Live

- Contributed to SSR-powered dynamic platform with admin component registry and real-time content updates

frontend-system-patterns | Production Architecture Patterns

GitHub

- Documented patterns for Dynamic SPA SEO, white-label systems, RBAC, configurators and API-driven UIs

v2-portfolio | Next.js Production Portfolio

Live | GitHub

- PWA with 3D configurators, 95+ Lighthouse scores, SMTP integration and modular architecture

EDUCATION

Jaypee Institute of Information Technology

Noida, India

Bachelor of Technology in Computer Science

2018 – 2022

ACHIEVEMENTS

Solved 250+ LeetCode problems Led 3 developers on 3D jewelry configurator delivery

NIC Full Stack Web Development Certificate 350+ Jira fixes in production

Built frontend-system-patterns public repository
